

Please also allow me to enumerate the minimally invasive surgical services that I provide both in Bariatric Surgery and General Surgery. I am also DaVinci Robotic Surgery Certified. I can perform these minimally invasive procedures via the DaVinci Robot or via laparoscopic technique.

ROBOTIC/LAPAROSCOPIC BARIATRIC SURGERIES

Robotic/Lap Gastric Bypass  
 Robotic/Lap Partial Gastrectomy with Roux-en-Y Reconstruction  
 Robotic/Lap Sleeve Gastrectomy  
 Robotic/Lap Lysis of Adhesions  
 Robotic/Lap Diagnostic Laparoscopy  
 Robotic/Lap Revision of Gastric Bypass  
 Robotic/Lap Revision of the Gastro-jejunal anastomosis  
 Robotic/Lap Conversion Sleeve to Gastric Bypass  
 Robotic/Lap Conversion from Lap Band to Sleeve Gastrectomy  
 Robotic/Lap Conversion from Lap Band to Gastric Bypass  
 Robotic/Lap Removal of Lap Band  
 Robotic/Lap Biliopancreatic Diversion with Duodenal Switch  
 Laparoscopic Evaluation for Internal Hernia, Intra-abdominal adhesions, etc.

ROBOTIC/LAP GENERAL SURGERIES

Diagnostic Laparoscopy  
 Robotic/Lap Cholecystectomy  
 Robotic/Lap Appendectomy  
 Robotic/Lap Ventral Hernia Repair  
  
 Robotic/Lap Nissen Fundoplication  
 Robotic/Lap Hiatal Hernia Repair  
 Robotic/Lap Inguinal Hernia Repair  
 Robotic/Lap Partial Colectomy  
 Robotic/Lap Splenectomy  
 Robotic/Lap Gastrectomy  
 Robotic/Lap Vagotomy & Pyloroplasty  
 Robotic/Lap Small Bowel Resection with Primary Anastomosis  
 Robotic/Lap partial or complete colectomy w/ colorectal anastomosis

Certainly, I also perform open general surgeries as listed below:

Exploratory Laparotomy  
 Small Bowel Resection with Primary Anastomosis  
 Partial or Total Colectomy with Primary Anastomosis  
 Bowel Resection with Colostomy or Ileostomy  
 Open Inguinal Hernia Repair with or without Mesh  
 Open Ventral Hernia Repair with or without Mesh  
 Open Splenectomy  
 Open Partial or Total Gastrectomy with BR I or BR II  
 Reversal of Colostomy

Hemorrhoidectomy  
 Anal Fistulectomy or Fissurectomy  
 Excision of Skin Lesions, Tumors, Cysts  
 Breast Lumpectomy w/ or w/o SNL Biopsy  
 Mastectomy  
 Mediport Placement and Removal  
 Incision & Drainage with sharp excisional Debridement – sacral decubitus  
 Below Knee or Above Knee Amputation

I also perform my own endoscopic procedures as listed below:

EGD w/ or without Biopsy	Colonoscopy w/ or w/o Cold or Hot Polypectomy (Screening)
EGD w/ Balloon or Savory Bougie Dilation	Colonoscopy with Balloon Dilation
EGD with Stent Placement	Colonoscopy with Stent Placement
EGD with Control of Bleeding	Colonoscopy with Control of Bleeding

Lastly, I want to get your attention on three very related disease processes that they present with the same symptoms such as acid reflux or heartburn; intractable nausea and/or vomiting; abdominal bloating or distention; and upper abdominal pain. These disease processes are Bile Reflux Gastritis/Esophagitis, GERD and Gastroparesis. Severe symptoms from both Bile Reflux Gastritis/Esophagitis can be ameliorated by performing Laparoscopic Partial Gastrectomy with Roux-en-Y Reconstruction so the patient can live a normal life without the symptoms listed above. Severe GERD can be treated with Laparoscopic Nissen Fundoplication to also increase a patient's quality of life and free of the above symptoms.
